Air heating and cooling equipment

Ducts, dampers, silencers and insulation for drying and ventilation systems.

OVERVIEW

Air and thermal system components connect and control airflow within ventilation, drying and heat recovery systems.

BENEFITS AND CHARACTERISTICS

- Tailored ducts and transitions
- Control valves (dampers)
- Industrial silencers
- Coordinated thermal insulation

This summary is informative. Dimensions, materials, performance and final scope are defined by engineering after the diagnosis of the actual conditions of the process.
