BRUNNSCHWEILER

PRELIMINARY TECHNICAL SUMMARY

Air control dampers

Control, balancing or insulation of air streams in industrial applications.

OVERVIEW

Dampers are configured according to their function in the system, flow range, pressure, temperature and seal level required.

BENEFITS AND CHARACTERISTICS

- Control or blocking according to application
- Manual or automated actuation
- Process-compliant materials
- Construction adapted to the duct

This summary is informative. Dimensions, materials, performance and final scope are defined by engineering after the diagnosis of the actual conditions of the process.
