

Circofloat dryers

Non-contact air drying for stable web handling and uniform material treatment.

OVERVIEW

The system uses controlled air cushions to support and dry continuous webs without mechanical contact with the surface.

BENEFITS AND CHARACTERISTICS

- Non-contact web guidance
- Uniform drying throughout the width
- Independent zone control
- Configuration adapted to the process

This summary is informative. Dimensions, materials, performance and final scope are defined by engineering after the diagnosis of the actual conditions of the process.
