BRUNNSCHWEILER

PRELIMINARY TECHNICAL SUMMARY

Coater Dryers

Controlled drying for coating applications in continuous processes.

OVERVIEW

Drying systems for Coater combine uniform distribution, thermal control and material stability after application of the coating.

BENEFITS AND CHARACTERISTICS

- Uniform drying profile
- Process zone control
- Careful handling of the material
- Integration with exhaust and recovery

This summary is informative. Dimensions, materials, performance and final scope are defined by engineering after the diagnosis of the actual conditions of the process.
