BRUNNSCHWEILER

PRELIMINARY TECHNICAL SUMMARY

Special heat exchangers

Settings developed for specific thermal services and structural restrictions.

OVERVIEW

When conditions do not fit into a conventional solution, engineering combines thermal balance, materials and dedicated geometry.

BENEFITS AND CHARACTERISTICS

- Arrangement developed for the process
- Integration with existing equipment
- Materials compatible with the service
- Maintenance considered from the concept

This summary is informative. Dimensions, materials, performance and final scope are defined by engineering after the diagnosis of the actual conditions of the process.
