BRUNNSCHWEILER

PRELIMINARY TECHNICAL SUMMARY

Machine hall ventilation

Comfort, security and structure protection around the process.

OVERVIEW

The general ventilation of the room is designed to control thermal loads, humidity, mist and air streams without damaging the process.

BENEFITS AND CHARACTERISTICS

- Better conditions for teams
- Moisture and condensation control
- Preserving structures and equipment
- Air distribution without critical areas

This summary is informative. Dimensions, materials, performance and final scope are defined by engineering after the diagnosis of the actual conditions of the process.
