Special fans

Dedicated solutions for process conditions that require unconventional configuration.

OVERVIEW

Applications with specific temperature, abrasion, corrosion, space or operating regime receive a solution developed from the actual assumptions of the plant.

BENEFITS AND CHARACTERISTICS

- Geometry dedicated to the application
- Fluid compatible materials
- Interfaces adapted to the installation
- Analysis of the full operating range

This summary is informative. Dimensions, materials, performance and final scope are defined by engineering after the diagnosis of the actual conditions of the process.
